Kampala, Uganda | +256 756 339 110 | gracenakiyemba256@gmail.com

[LinkedIn](#) | [Portfolio](#) | [Github](#)

PROFESSIONAL SUMMARY

Software Engineer based in Kampala, Uganda, with demonstrated experience developing full-stack applications using Python, Django, JavaScript, and React. Proven ability to design and deliver functional, real-world systems, including a role-based enterprise stock and sales management platform and an award-winning USSD/SMS health technology solution. Complements technical expertise with strong communication and community engagement capabilities, having built and sustained a professional LinkedIn community exceeding 8,000 followers focused on technology, leadership, and women's advancement in STEM. Committed to leveraging technical skill and strategic communication to drive innovation and inclusive digital transformation across Africa.

CORE COMPETENCIES

Languages & Frameworks: Python, JavaScript, HTML, CSS, React JS, Django, FastAPI, WordPress

AI & Data: AI & Machine Learning, Data Analytics, REST APIs

Infrastructure & Security: Cloud Computing, Cybersecurity

Tools: Git, GitHub, VS Code, Node.js

Communication & Leadership: Public Speaking, Community Engagement, Impact Storytelling, Digital Communications, Content Creation, Leadership, Critical Thinking, Problem Solving, Teamwork, Adaptability

PROFESSIONAL HIGHLIGHTS

- Built Project Nyondo, a full-stack Django stock and sales management system for a hardware business, featuring role-based access control, automated invoicing, and a salary-earner deposit scheme
- Co-developed AmaniCare, a USSD/SMS women's health companion for 2G devices — Winner, Africa's Talking Women in Tech Hackathon (2026)
- Winner, Code Queen Cohort 14 Hackathon, as Scrum Master of the KaCyber SafeMove project
- Built and manage a LinkedIn community of 8,000+ followers through consistent technical storytelling and digital engagement
- Featured by Ellevest Amsterdam for leadership and active participation in the Groundbreaker Talents Programme
- Speaker at the International Women's Day 2026 event hosted by GDG Cloud Mbarara and Women Techmakers Mbarara
- Speaker at International Day of Women and Girls in Science 2026 hosted by Women Ascension UK.
- Elected Class President, Groundbreaker Talents Cohort 6

PROFESSIONAL EXPERIENCE

Software Engineer — Independent & Academic Projects

Kampala, Uganda | 2025 – Present

- Built Project Nyondo, a production-style Django system managing stock, sales, supplier credit, and a salary-earner deposit scheme with role-based dashboards for Admin, Store Manager, and Sales Attendant roles
- Serving as Scrum Master on NeuronNest, an active app development project
- Completed a Python Development Internship at Codveda Technologies, contributing to real-world backend projects
- Worked through Django architecture and object-oriented design principles (Composition, Low Coupling, High Cohesion) across additional academic projects, including Videx and ParkEase

Personal Brand Strategist & Content Creator

LinkedIn | January 2025 – Present

- Grew a professional LinkedIn community to over 8,000 followers through authentic technical storytelling and audience engagement
- Create content focused on software engineering, leadership, innovation, and women's empowerment in tech
- Collaborate with professionals and organizations to amplify initiatives promoting education, innovation, and community development
- Developed a personal brand that has led to speaking engagements, mentorship opportunities, and international recognition

Social Media Manager

CTK Worship Team | 2024 – 2025

- Planned and executed content strategies across multiple social media platforms
- Created engaging visual and written content that strengthened audience engagement
- Supported communication campaigns and promoted events through digital platforms

Class President

Groundbreaker Talents, Cohort 6 | 2026 – Present

- Represent learners and strengthen communication between students and programme leadership
- Coordinate learner engagement initiatives and promote collaboration within the cohort
- Advocate for student needs while fostering an inclusive and supportive learning environment

Co-Facilitator & Mentor

Build Her Tech Mentorship Programme | 2026

- Co-facilitated mentorship sessions encouraging girls and young women to pursue careers in technology
- Shared career experiences and guidance to inspire confidence and leadership
- Supported collaborative learning and peer engagement

LEADERSHIP & COMMUNITY IMPACT

Committed to empowering young people through mentorship, technical storytelling, and hands-on software engineering. Actively participates in leadership programmes, hackathons, and community initiatives that promote digital inclusion, innovation, and youth empowerment in technology across Africa.
